

NGUYỄN DUY TÂN

Software Developer

"I am 4th year student with a focused and serious personality. I have skills in software development, and I am currently studying Information Technology - Software Engineer at the Nguyen Tat Thanh Institute of International Education. So I believe I will do well in this position. Furthermore, I am serious about this job and passionate about software development. I am sure, in the long term, I will provide the best projects."

Work Experience

Internship Developer
Ho Chi Minh City University of Education

Our group during the internship at the University has participated in some research project such as:

- Face recognition:
Develop a face recognition system for the University in order to easily and strictly monitor students in the campus

- Location-based Fire Alarm:

This research project is applied to the apartments or campus buildings in case of a building fire. This device will deliver signals and the location of the fire for the emergency responders to quickly respond

- In addition, our group has also participated in other small projects such as creating the van-hoc-dan-gian website, which is a website used to aid students to search for a Vietnamese dictionary.
- Another project is the admission website for the post-graduate students to register for Master and Doctoral degrees
